Vehicle Maintenance Schedule

	Thousands of Miles																							
	5	10	15	20	25	30	35	40	45	50	55	60	65	70	75	80	85	90	95	100	105	110	115	120
5,000 Mile Intervals																								
Change Oil and Filter																								
Wash/Clean Vehicle																								
Inspect Brake Pads and Shoes																								
Inspect Tires Inflation/Wear																								
Inspect Belts for cracking/fraying																								
Inspect Transmission Fluid Level																								
Inspect Power Steering Fluid																								
Inspect Brake Fluid Level																								
Inspect Windshield Washer Fluid																								
Inspect Battery/Cables Clean																								
15,000 Mile Intervals																								
Rotate and Balance Tires																								
Wheel Alignment																								
Change Windshield Wipers																								
Inspect Engine Air Filter																								
Inspect Coolant (AntiFreeze) Level																								
Inspect Brake Lines																								
Inspect Ball Joint																								
Inspect Driveshaft Boots																								
Inspect Steering Boots																								
Inspect Exhaust System																								
30,000 Mile Intervals																								
Change Cabin Air Filter																								
Change Engine Air Filter																								
Change Transmission Fluid																								
Change Battery (if needed)																								
Change Brake Pads/Shoes																								
Inspect Front Differential Oil																								
Inspect Fuel Lines/Gaskets																								
Inspect Hoses (Brittle, Cracked)																								
60,000 Mile Intervals																								
Change Timing Belt																								
Inspect Drive Belts																								
120,000 Mile Intervals																								
Change Spark Plugs																								
Change Engine Coolant
